# JNFLEX CHANGZHOU CO., LTD

## 常州市江南波纹管有限公司

To become the most valuable enterprise in flexible connection and protection solutions.

JNFLEX (CHANGZHOU) CO., LTD established in 1995 and located in Changzhou City, Jiangsu province, is a high-tech enterprise dedicated to providing customers with flexible connection and protection products and solutions. We specialize in the design, development, production, and technical service of various corrugated duct, flexible ducts and tubes, stainless bellows, and kinds of plastic corrugated hoses. Since 1995, JNFLEX has grown into a large-scale enterprise with over 120 employees, more than 20% of whom are R&D personnel, having obtained ISO9001 and IATF16949 certifications. Our products serve a variety of industries, including construction and infrastructure, automotive and marine, high-speed trains, steel metallurgy, environmental protection, and new energy industry etc. We have established long-term collaborations with Fortune 500 companies both domestically and internationally. Our sales network spans more than twenty provinces, municipalities, and autonomous regions across China, and we exported to Europe, North America, Southeast Asia, Australia, South America, and Africa for many years.

"Customer Requirements Are Our Responsibility," we're dedicated to providing the tailor-made solution for each individual client, helping them succeed in their business, ensuring that our customers gain a competitive edge through attention to detail. "Stay hungry. Stay foolish." JNFLEX is committed to growing with you and becoming a reliable partner on your path to success.

### 成为“柔性连接与防护”最具价值的公司

常州市江南波纹管有限公司成立于1995年，公司位于江苏常州，是一家集设计开发、生产制造、技术服务为一体的专业生产各种波纹软管、伸缩软管、金属软管、塑料波纹软管等管路连接和保护类产品，致力于为顾客提供柔性连接和柔性保护类产品解决方案的高新技术企业。公司自创立以来，已经发展成拥有120多名员工，建筑面积30000平米的规模化企业，其中研发人员占比20%以上，公司高度重视加强品质保证和提升管理水平，已通过ISO9001、IATF16949质量管理体系认证，为建筑及基础设施、汽车船舶、高速列车、钢铁冶金、环保新能源等多个行业提供优质产品，并与国内外500强企业建立长期合作关系。我们销售网络遍布中国二十多个省市自治区直辖市，并出口到欧美东南亚澳洲南美非洲等国家和地区。

江南波纹管秉承“顾客的要求就是我们的责任”的经营理念，始终追求更高的品质和致力于为客户提供最佳的个性化解决方案，创造价值，降低成本，让客户赢在细节之上。Stay.hungry.Stay.foolish江南愿意与您共同发展，成为您成功道路上忠诚的合作伙伴。

## BRAIDED SLEEVE 编织管

### 产品介绍 Product Introduction

采用耐磨丝编织而成。用于汽车磨擦较多的环境，套在胶管、线束外起防磨和保护作用。

Abrasion-resistant braided sleeving constructed with engineered wear-resistant yarns, specifically designed for high-friction automotive applications to provide mechanical protection for rubber hoses and wiring harness assemblies.

**耐水**  
Water resistance

**耐热**  
Heat-resistant

**优异的耐磨性**  
Excellent wear resistance

**与被保护软管配合紧密**  
Closely cooperate with the protected hose

### 基本用途 Basic application

电脑周边连接线、HDMI、电脑电源线束、加工电器、汽车线束、灯饰、网络音频线、光缆、大型机械线路的保护与美化

Computer peripheral connection cable HDMI、Protection and beautification of computer power wiring harnesses, processing appliances, automotive wiring harnesses, lighting fixtures, network audio cables, optical cables, and large mechanical circuits

### 实验测试 Experimental testing

## HEAT SHRINK SLEEVE 热缩管

### 产品介绍 Product Introduction

由高韧性聚酯多丝和高耐性聚酯多丝编织，经特殊设计的粘合系统加工而成。

Engineered composite braid comprising high-tensile polyester multifilament and ultra-wear-resistant polyester multifilament yarns, integrated through proprietary thermofusion bonding technology.

**工作温度最高可达150°C**

The maximum working temperature can reach 150 °C

**预热收缩, 收缩比为2:1**

Preheating shrinkage, with a shrinkage ratio of 2:1

**优异的耐磨性**

Excellent wear resistance

**配合紧密**

Closely coordinated

**重量轻**

Light weight

**降噪**

Noise reduction

### 基本用途 Basic application

为橡胶管和其他管道提供优良的抗耐磨性能

Provide excellent wear resistance for rubber pipes and other pipelines

### 实验测试 Experimental testing

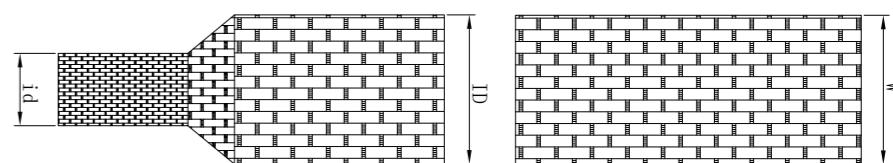

#### • ELV • 阻燃性能

ELV Flame retardant performance

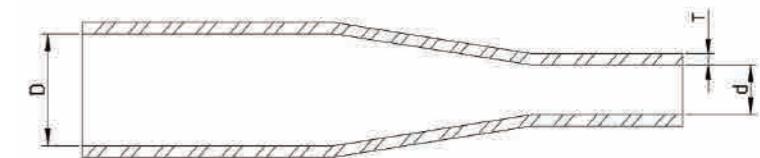

### 性能测试 Performance test

### 产品介绍 Product Introduction

为汽车空调制冷剂管、汽车线束等部件提供抗冲击、防摩擦、抗压保护。空调制冷剂管等部件提供抗冲击、抗压保护、保温；也可用于机械制造、汽车制造、航空设备、地铁、火车、自动化控制等行业。

Engineered protective solutions deliver impact resistance, abrasion protection, and compressive strength for automotive A/C refrigerant lines, wiring harness assemblies, and critical components. These systems provide integrated thermal insulation for refrigerant conduits while offering multi-axial mechanical protection. The technology is cross-industry adaptable, serving automotive manufacturing, aerospace equipment, rail transit systems (metro/rolling stock), and industrial automation controls.

**重量轻**  
Light weight

**自由弯曲**  
Free bending

**弯曲时不改变截面面积**  
Bending does not change the cross-sectional area

**可以承受脚踩的重压，迅速恢复，本身无任何损伤**  
Foot-traffic resistant elastomeric recovery with non-destructive resilience

**耐水耐油，耐热耐腐蚀**  
Water and oil resistance, heat and corrosion resistance

# CONNECTION / 连接

## ALUMINUM AIR DUCT

# 铝风管

### 产品介绍 Product Introduction

采用玻璃纤维布和弹性钢丝缠绕而成、外层包覆保温材料。主要用于气体的输送，尤其适用于不规则空间的柔性连接。风管在外部受压或震动时，能保证管内最大的通风空间。

Made by winding glass fiber cloth and elastic steel wire, and wrapped with insulation material on the outer layer. Mainly used for gas transportation, especially suitable for flexible connections in irregular spaces. When the air duct is subjected to external pressure or vibration, it can ensure the maximum ventilation space inside the duct.

#### 自由弯曲

Free bending

#### 工作温度

-40°C~+100°C

#### 对流体和化学成份有良好抗性

Has good resistance to fluids and chemical composition

#### 阻燃性好

Good flame retardancy

符合德国及欧洲对汽车、船舶、轨道车辆、建筑材料的防火标准 (DIN5510、DIN4102、IMO FTPC , PART 5)

Compliant with German and European fire protection standards for automobiles, ships, rail vehicles, and building materials (DIN5510, DIN4102, IMO FTPC, PART 5)

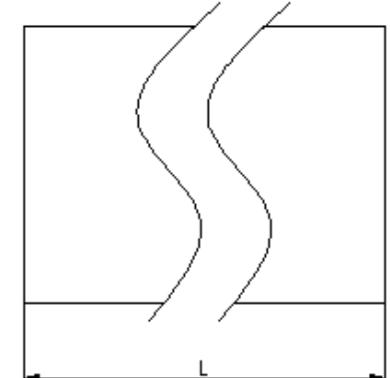

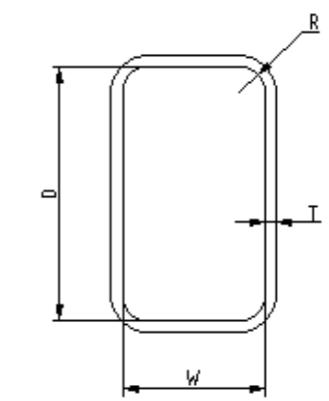

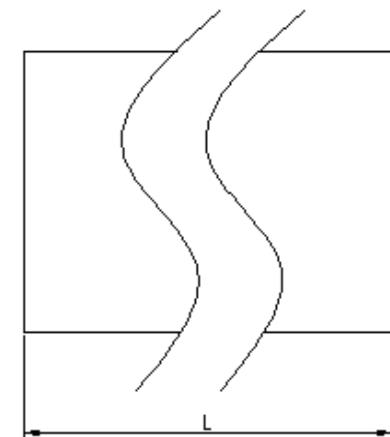

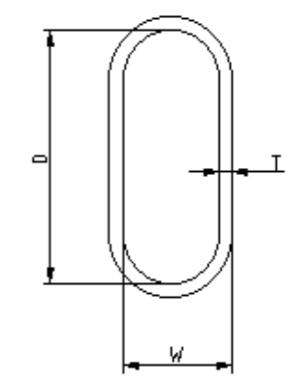

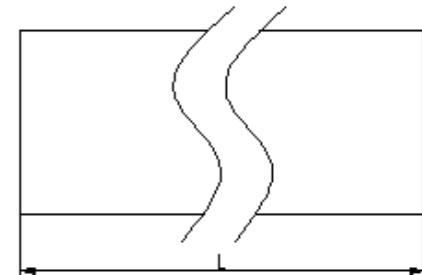

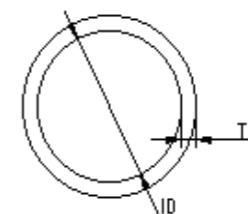

### 基本用途 Basic application

常用于大巴、房车、轨道车辆、游艇、别墅新风换气的空调系统内

Commonly used in air conditioning systems for buses, RVs, rail vehicles, yachts, and villas for fresh air exchange

## CONNECTION / 连接

SILENCING DUCT

# 消音风管

### 产品介绍 Product Introduction

配备了椭圆形、多边形、圆形的消声器或矩形器，该管全部采用铝制打孔带材生产，消声管内外用软管，能更好地阻断来自空气的扩散声源和机器及空调设备中的噪音。隔音层厚10mm至50mm，也可以根据不同的隔音要求定做。

Equipped with elliptical, polygonal, and circular mufflers or rectangular tubes, all of which are made of perforated aluminum strips. Soft hoses are used inside and outside the muffler tube to better block the diffusion of sound sources from the air and noise from machines and air conditioning equipment. The sound insulation layer is 10mm to 50mm thick, and can also be customized according to different sound insulation requirements.

**耐高温及防火**  
High temperature resistance and fire prevention

**自由弯曲**  
Free bending

**阻燃**  
Flame retardant

**吸音、降噪**  
Sound absorption and noise reduction

### 基本用途 Basic application

常用于大巴、房车、轨道车辆、游艇、别墅新风换气的空调系统内

Commonly used in air conditioning systems for buses, RVs, rail vehicles, yachts, and villas for fresh air exchange

### 实验测试 Experimental testing

- **保温性能**

Thermal insulating property

- **禁限用物质**

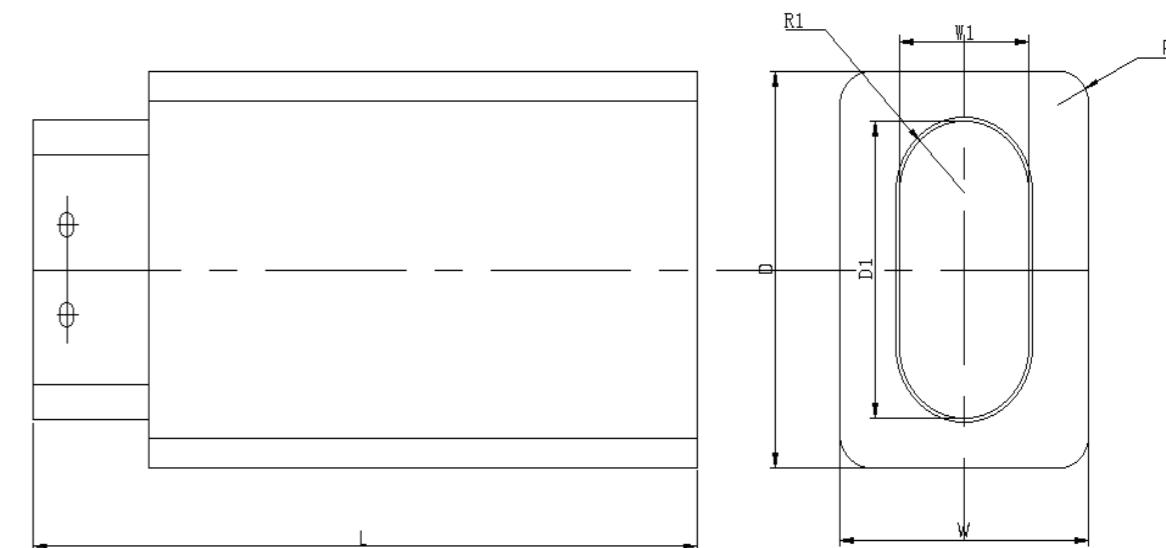

Prohibited and restricted substances

### 性能测试 Performance Test

测试项目 Test Item	测试条件 Test Condition
<b>工作温度</b> Operation temperature	-40°C ~ +80°C

### 产品规格 Product Specification (mm)

接口尺寸 Interface size (mm)	材料 Material
123*58	
125*58	铝+玻璃棉+接头 Aluminum+glass wool+connector
105*58	
圆形可定制	Circular customizable

## CONNECTION / 连接

### SILICONE SOFT AIR DUCT

# 硅胶软风道

#### 产品介绍 Product Introduction

采用玻璃纤维布和弹性钢丝缠绕而成、外层包覆保温材料。主要用于气体的输送，尤其适用于不规则空间的柔性连接。风管在外部受压或震动时，能保证管内最大的通风空间。

Made by winding glass fiber cloth and elastic steel wire, and wrapped with insulation material on the outer layer. Mainly used for gas transportation, especially suitable for flexible connections in irregular spaces. When the air duct is subjected to external pressure or vibration, it can ensure the maximum ventilation space inside the duct.

自由弯曲  
Free bending

工作温度  
-40°C~+100°C  
Working temperature  
-40 °C ~ +100 °C

对流体和化学成份有良好抗性  
Has good resistance to fluids and chemical composition

阻燃性好  
Good flame retardancy

符合德国及欧洲对汽车、船舶、轨道交通车辆、建筑材料的防火标准 (DIN5510, DIN4102, IMO FTPC, PART 5)

Compliant with German and European fire protection standards for automobiles, ships, rail vehicles, and building materials (DIN5510, DIN4102, IMO FTPC, PART 5)

#### 基本用途 Basic application

常用于大巴、房车、轨道车辆、游艇、别墅新风换气的空调系统内

Commonly used in air conditioning systems for buses, RVs, rail vehicles, yachts, and villas for fresh air exchange

#### 实验测试 Experimental testing

• 保温性能  
Thermal insulating property

• 导热系数  
Thermal conductivity

#### 产品规格 Product Specification (mm)

可定制 Customizable

## ACCESSORIES / 配件

### ACCESSORIES FOR RAIL TRANSIT

# 轨道配件

#### 产品介绍 Product Introduction

铝合金材料，用于通风管路连接处，与铝风管配套使用。为铝风管的安装、连接、加长及固定。

Aluminum alloy material, used for connecting ventilation ducts and used in conjunction with aluminum air ducts. Installation, connection, extension, and fixation of aluminum ducts.

质量轻、强度好、美观  
Lightweight, strong, and aesthetically pleasing

耐腐蚀性、无磁性、无毒性  
Corrosion resistance, non-magnetic, non-toxic

耐低温  
Low temperature resistance

#### 基本用途 Basic application

通风管路连接处

Ventilation pipeline connection

#### 产品规格 Product Specification (mm)

端口, 法兰, 哈夫, 喉箍, 密封垫等均可提供

We can also provide all kinds of connectors, different flanges, hose clamp and gaskets, etc.

#### 端口

Connector

**哈夫**  
Connection

**喉箍**  
Hose clamp

**内接口**  
Inner joint

**塑料法兰**  
Plastic flange

**铝法兰**  
Aluminum flange

**密封垫**  
Gasket
